Senior and Lead Mobile Engineer with a Computer Science degree and **7 years shipping scalable, high-performance apps** in Flutter, Android, and iOS — from banking super-apps to one of the world's largest resort platforms, used by millions. Increasingly building **agentic coding workflows and Cursor-style agents** to move faster without sacrificing architecture, testing, or code quality. Leads feature delivery, mentors engineers, and drives architectural decisions across large-scale products.

CORE SKILLS

Flutter — 7 yrs

Android / Kotlin · Java — 2 yrs

iOS / Swift — 2 yrs

React Native — 1 yr

App Architecture

Performance Optimization

Code Quality & Reviews

Design Systems

AI & Agents

Coding Agents

Agentic Workflows

AI-Assisted Shipping

Dart · Swift · Kotlin · TS · Python

EXPERIENCE

Senior Mobile Engineer — Very Good Ventures

Jul 2025 — Present

- Build high-quality Flutter apps for clients across industries at Google's lead Flutter partner, upholding clean architecture, testing, and code quality.
- Build and use agentic coding workflows and Cursor-style agents to ship faster without sacrificing quality.

Senior Mobile Engineer — MGM Resorts

Mar 2023 — Jun 2025

- Contributed to one of the world's largest resort apps, driving architecture and performance improvements.
- Led feature delivery to high quality and architectural standards; ran code reviews and onboarded new developers.

Mobile Engineer — CourseKey

Oct 2022 — Feb 2023

- Led the architecture migration from Redux to Bloc, boosting performance and maintainability.

Mobile Engineer — AMcom

May 2022 — Oct 2022

- Built a large-scale banking app in Flutter and maintained the design system, ensuring app-wide consistency.

Mobile Engineer — EurekaLabs

2020 — 2022

- Delivered end-to-end Flutter apps and built native plugins in Swift and Kotlin; led code reviews and architecture planning.

Fullstack Engineer — InovaClick Software

2019 — 2020

- Built Android and Swift mobile projects and NodeJS APIs; maintained ASP.NET web applications.

PUBLICATION

Local DEA: Saving Lives with Accessible, Well-Located AEDs

PLOS ONE · 2025

- Peer-reviewed research (PLOS ONE 20(2), e0318065). Co-author leading the Flutter app across Android and iOS — architecture, implementation, and expert validation.

SPEAKING

Bridging Ecosystems: Embedding Flutter Components in a Web App

FlutterCon USA · 2026

- Conference session on Flutter's Multi-View Web API and Dart JS Interop — embedding Flutter into host web apps from one codebase.

EDUCATION

B.Sc. Computer Science — State University of Maringá

2018 — 2022

- Represented the university in competitive programming marathons, taking on team leadership roles.
